

eWriting Student Guide

Outline

KWHL Chart

The KWHL Chart allows students to organize their ideas into different categories; what they **K**now, what they **W**ant to know, **H**ow they will research, and what they **L**earned. Students begin with a single row in the chart, but can add more rows by hitting the Tab key while their cursor is in the last cell or by right-clicking the table and using the menu that appears.

The Rough Draft step allows students to write an initial draft of their essay based on their ideas from the Pre-Writing step. Students are still able to use their prompt, rubric, checklist, and research tools
